$$Q^{\pi_0}(s,a) = \sum_{s',r} p(s',r|s,a)\left[r + \gamma V^{\pi_0}(s')\right]$$

$V^{\pi_0}(s_1) = 10$, $V^{\pi_0}(s_2) = 5$ $\Rightarrow$ $0.9 \times \ldots = 9, 4.5$

$\Rightarrow Q^{\pi_0}(s_1, a_1) = 0.6 \times (1 + 9) + 0.4(1 + 4.5) = 10$

$Q^{\pi_0}(s_1, a_2) = 7.5$

$Q^{\pi_0}(s_2, a_1) = 10$

$Q^{\pi_0}(s_2, a_2) = 5$
